Zorbe Indoor Liquid Spill Absorbent

- Lightweight natural absorbent
- Instantly immobilizes liquid and semi-liquid spills
- Spills can be swept away leaving surfaces dry and clean

CLEAN UP SPILLS IN 3 EASY STEPS

POUR

SWEEP

DISPOSE

SI Indoor waterless spill clean-up technology can reduce the risk of slip fall injury. It will immediately immobilise and solidify liquid spills that can then be swept up leaving a clean and dry surface.

It will work on liquids, semi-liquids and moist solids making it a must in high traffic areas where food and drinks are sold.

The unique characteristic of the natural material is that it can wick liquids into itself by capillary attraction. SI Indoor is harmless when used as directed and is non-toxic and non-hazardous to humans and animals.

SI Indoor can save time and money (estimated to be up to 60%) over traditional wet cleaning methods.

Environmentally, SI Indoor will stop many spills leaching or being washed into drains as absorbed spills can be disposed in normal waste.

Spillfix International
5 / 308 Kororoit Creek Rd
Williamstown North Vic 3016
