

BIO-WASTE SPILL KIT

SpillFix Bio-Waste Spill Kit is a simple and safe method to clean potentially infectious human and animal spills.

- ✓ BLOOD SPILLS
- ✓ URINE SPILLS
- ✓ VOMIT SPILLS
- ✓ FAECES SPILLS

DO HAPPEN!

POTENTIAL RISK

- Human and animal spills can be highly infectious and prompt response can minimise potential contamination.
- Liquid and semi-liquid spills can be a potential slip/fall risk if left exposed and unattended.
- Many of traditional clean-up methods such as bucket and mop, cleaning cloths and towels can increase potential contamination.

SpillFix Bio-Waste Spill Kit can minimise the risk of exposure and cross contamination. Each kit contains SpillFix Bio-Waste Absorbent, personal protection equipment (PPE), and clean-up and waste disposal items to help clean-up spills quickly with minimum exposure risk.

What is Bio-Waste Absorbent?

SpillFix Bio-Waste is a non-toxic lightweight powder made from an inert natural mineral mined and processed in Australia. A blend of natural Australian essential oils and plant extracts is added for its natural fragrance and inherent properties.

SpillFix Bio-Waste absorbs liquid on contact by the process of capillary attraction; the liquid is immediately absorbed into microscopic pores. The particle size distribution optimises surface contact and its strong wicking action draws fluids into the material rapidly.

What are the benefits of using SpillFix Bio-Waste Spill Kit?

EFFICIENCY AND SAFETY:

SPILLFIX Bio-Waste immediately absorbs spills so they can be removed from the surface and contained. Reduce slip hazard by covering spills and surfaces are left clean and dry. SPILLFIX Bio-Waste Spill Kit provides disposable personal protection equipment (PPE) to reduce exposure risk and enable proper disposal.

SIMPLIFICATION:

SPILLFIX Bio-Waste Spill Kit comes complete to treat and remove human and animal bio-waste spills.

ODOUR:

SPILLFIX Bio-Waste minimises odours produced by spills when absorbed, the blend of natural essential oils and plant extracts provides a pleasant fragrance mask.

EASE OF HANDLING:

SPILLFIX Bio-Waste Spill Kit is very light to handle, store and carry on board transport vehicles. Treated spills can be removed from the surface effortlessly and without the use of any other treatment.

LABOR COST:

Because of the speed and efficiency of SPILLFIX Bio-Waste, labour costs and time to clean up a spill can be reduced considerably. Reduces the inconvenience of isolating spill areas for long periods.

ENVIRONMENTAL:

SPILLFIX Bio-Waste stops potentially hazardous spills being washed into wastewater or stormwater.

Where can it be used?

Public venues: SPILLFIX Bio-Waste provides a simple and fast clean up routine that instantly renders the floor completely clean and dry. Closed areas are opened up more quickly as there is no delay for mopping and drying.

Public Transport: Taxis, Buses, Airlines, Trains and Vessels can use SPILLFIX Bio-Waste to immediately immobilise spills to improve passenger safety and comfort. Reduce vehicle downtime for spill clean up.

Ambulance and Emergency Services: SPILLFIX Bio-Waste can safely treat potentially infectious body fluids quickly while attending to a patient's care. It will protect emergency staff and reduce vehicle downtime for cleaning.

Police and Correctional Services: SPILLFIX Bio-Waste will reduce the time spent cleaning transport and holding facilities while protecting officers from potential contamination when working around and cleaning spilled body fluids.

Healthcare: SPILLFIX Bio-Waste can safely treat fluid spills quickly while attending to a patient's care. It will help to protect staff and reduce the slip fall risk for other patients, staff and public. Can be used in waiting room and reception areas.

Childcare and Schools: SPILLFIX Bio-Waste will decrease the incidence of slip fall and cross contamination to children and staff by immobilising spills immediately.

Animal Healthcare and Transport: SPILLFIX Bio-Waste can treat urine, vomit, faeces and blood spills in surgery and waiting room areas as well as holding and transport facilities.

Hospitality: SPILLFIX Bio-Waste will save time and improve staff safety in spill clean up. Contaminated areas can be opened faster and minimise slip fall risk.
